

EG Solar Power Solutions
Made in Italy
SYSTEM

Specialists in Large-Scale Photovoltaic Plants

Accelerating Innovation in Large-Scale Photovoltaic Plants

EGsystem is the strategic partner for those seeking to maximise the efficiency, reliability, and speed of deployment of their solar farms.

With over two decades of experience in the sector, our mission is to provide comprehensive and innovative solutions for managing large-scale photovoltaic plants, with a strong focus on maintenance, advanced electrical panels, and cutting-edge container solutions.

We don't do a little bit of everything – we are specialists in these specific areas, and we strive to do what we do better than anyone else.

Preparing for the Future of Renewable Energy with EGSysystem

**We believe
in the future.**

Scenario

Looking Ahead: Towards 2030 and Beyond

With 2030 on the horizon, the adoption of electric energy is becoming increasingly widespread, and pressure on power grids is rising.

Only large-scale ground-mounted photovoltaic systems can meet this growing demand, utilizing unused land and transforming abandoned spaces into valuable resources.

Our journey stems from the vision of a sustainable world, where clean energy becomes the beating heart of our lives.

Our Commitment: Innovation and Renewal

Our mission is to renew and innovate, with the goal of contributing to a more independent and shared energy future.

Photovoltaics is more than just a technology—it is a symbol of efficiency, freedom, and positive innovation.

Why Choose EGSystem?

In the dynamic world of renewable energy, efficiency is not an option—it is a necessity.

EGSystem accelerates the transition to clean energy with products designed to withstand the most challenging conditions and deliver consistent performance over time.

Our solutions represent Italian excellence, with top-tier quality standards developed specifically for companies and investors who see photovoltaics as a strategic choice for the future.

A sustainable and **Concrete Vision**

**Let's build the future
of energy together.**

We believe sustainability should be at the heart of every business decision, and every photovoltaic plant represents a tangible step towards a cleaner, self-sufficient world.

Our Values

**CONTINUOUS
INNOVATION**

**TECHNOLOGICAL
LEADERSHIP**

**SPECIALISATION IN
LARGE-SCALE
PHOTOVOLTAIC
PLANTS**

**ITALIAN

systems.**

Security and reliability in service of solar energy

In a sector that demands precision and reliability, EGSystem offers a complete range of AC electrical panels designed to protect and connect solar inverter outputs in photovoltaic systems.

With 20 years of experience, we manage the entire production cycle, from design to implementation and transportation, providing safe and tested solutions for our clients.

- Design, manufacturing, and transportation
- Complete cycle management
- 20 years of experience
- Proven methodology: zero worries, zero risks
- Safety, professionalism, and specialisation

The Benefits of Choosing EGSys^{tem}:

A COMPLETE AND SECURE SOLUTION

Italian Excellence

Developed according to the highest quality and safety standards.

Organised installation and transport

Ensuring seamless integration.

Customised Design

Perfectly tailored to each system's specifications

Advanced Technical Features

We embrace innovation and always choose the best available technology.

Security and Reliability

Clear procedures and a highly specialized team with 20 years of experience guarantee high safety standards.

ELECTRICAL PANELS

DESIGN, IMPLEMENTATION, AND TRANSPORTATION

**Complete cycle
management**

This means:

**safety
professionalism
specialization
zero thoughts
zero risk**

Who We Serve

**Our AC electrical panels
are ideal for:**

- **Companies owning solar farms that require efficient and durable solutions**
- **O&M (Operation and Maintenance) operators seeking reliable infrastructure management**
- **Photovoltaic plant builders looking for a complete, safe, and ready-to-use solution**

EG Solar Power Solutions
Made in Italy
POWER

SHELTER

Fast and Simplified Implementation

With our prefabricated shelters, you can accelerate construction and bring your systems into production more quickly, saving time and resources.

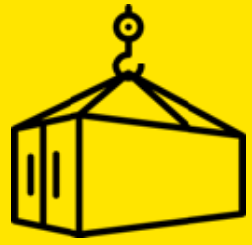

SHELTER

Revamping And repowering

We are committed to upgrading and enhancing aging systems to maximize power output and fully leverage the remaining years of the Conto Energia incentive program, up until its expiration in 2032.

SHELTER

EGPOWER

Shelter

Efficiency

and Innovation

High-quality shelters designed to optimize the performance of large-scale photovoltaic systems.

Our technologically advanced shelters are designed to facilitate operational management and maintenance, with a strong focus on durability and energy efficiency. They provide the ideal solution for investors and companies aiming for the rapid implementation of large-scale projects.

We have chosen the practicality and durability of metal shelters over the excessive weight of reinforced concrete structures.

- ✓ Maximum innovation level**
- ✓ Remote system control**
- ✓ Efficiency and fast installation**

SHELTER

The Concrete Benefits of EGPower

Implementation quick and simplified

With our prefabricated shelters you speed up the construction and production of your installations, saving time and resources.

Full Support

Our many years of experience in photovoltaics allows us to offer a highly qualified technical highly qualified technical and after-sales service qualified, which will accompany you at every stage of the life cycle of the system.

Excellence without compromise

We are synonymous with quality and Italian professionalism, with solutions designed to optimise the performance the performance of your plant and maximise the return on your investment.

20 Years of Expertise

When you rely on EGsystem, you not only get high quality products, but also quality products, but also the guarantee of a partner that every detail for you. Our experience and tried and tested method ensure that your installations operate at their best, without any unforeseen events, allowing you to sleep and focus on your goals.

Reliability and Italian Excellence

With EGsystem, you are assured of a solution developed to the highest Italian quality and safety standards. Our aim is to offer only the best, accompanying each customer with professionalism and continuous support. For us, your satisfaction is a priority, and every project is an opportunity to consolidate our reputation for excellence.

Maintenance of Large-Scale Photovoltaic Systems

Reliability - Efficiency - Promptness

These are the pillars of our maintenance and support services for large-scale ground-mounted photovoltaic systems.

We stand by companies to ensure maximum system performance, preserving their value over time and guaranteeing fast and effective interventions in case of emergencies.

MAINTENANCE & ASSISTANCE

Regular monitoring and scheduled interventions to keep your system at peak efficiency.

Periodic cleaning and vegetation management to maximize sun exposure and prevent obstructions or malfunctions.

Thermographic analysis to anticipate failures and ensure business continuity, reducing fire risks, system issues, and downtime.

Extraordinary Maintenance, Assistance, and Emergency Interventions

In case of failures, damage, or theft, we respond quickly to restore system functionality.

We understand the importance of minimising downtime.

Our team is equipped to intervene within **4 hours** of a reported malfunction.

With modern equipment and qualified technicians, we resolve issues as quickly as possible, ensuring a fast and safe return to operation.

Italian Excellence in Photovoltaics

**Ours is an Italian excellence
which is reflected in every aspect**

From products to services, including after-sales support, we ensure total efficiency and high standards without compromise.

For us, customer satisfaction and environmental responsibility are top priorities.

EGsystem Guarantees:

- Rapid intervention – within **4 hours** on our systems
- Specialized and trained technical staff
- High standards and a passion for excellence, characteristic of Italian craftsmanship
- Partnerships with top-tier suppliers that guarantee durability, support, and excellence
- 20 years of industry experience
